## Terms

- The database contains **items** (tools, workflows, approaches, demonstrators, applications...)
- Each item has its **name** and a number of describing it **attributes**

<hr/>	
iNaturalist	
<hr/>	
Web	<a href="http://www.inaturalist.org">http://www.inaturalist.org</a>
<hr/>	
Category	civic science project
<hr/>	
Field	natural sciences
<hr/>	
Description	iNaturalist is an online social network of people sharing biodiversity information to help each other learn about nature. It's also a crowdsourced species identification system and an organism occurrence recording tool. You can use it to record your own observations, get help with identifications, collaborate with others, collect this kind of information for a common purpose, or access observational data collected by iNaturalist users.
<hr/>	

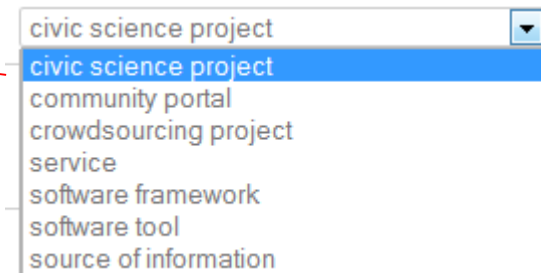

## Attributes

- The number of attributes is variable
- Attributes have:
  - Single value (occur once) *e.g. description, status*
  - Multiple values (occur many times) *e.g. category, field*
- Attributes may be:
  - Mandatory *e.g. category, web*
  - Optional *e.g. status, technology*
- Attributes are of different types:
  - Enumerated (set of predefined values)
  - Text
  - Numbers
  - Date
- Set of attributes may be changed in future
- **The limitations aim at formally correct content!**

You may add (+)  
or remove (-) them

You cannot add it more  
than once

You cannot remove last  
value of the mandatory attribute

Grant agreement n. 632694

## Roles

- The editor
  - can add items
  - can modify „own” items (soon)
- The moderator
  - can add items
  - can edit all items
  - can delete items

## Please contribute

- The Registry is crowdsourcing initiative itself 😊
- **Become an online editor**  
(optionally send your contribution via e-mail)
- Propose enhancements in metadata (new attributes)
- Suggest improvements in how the Registry works
- Report technical problems (if any)

Grant agreement n. 632694
