

Objects, preservation, participation, and education in a digital world

Museum für Naturkunde Berlin

Gregor Hagedorn & Johannes Vogel, 2015-11-12

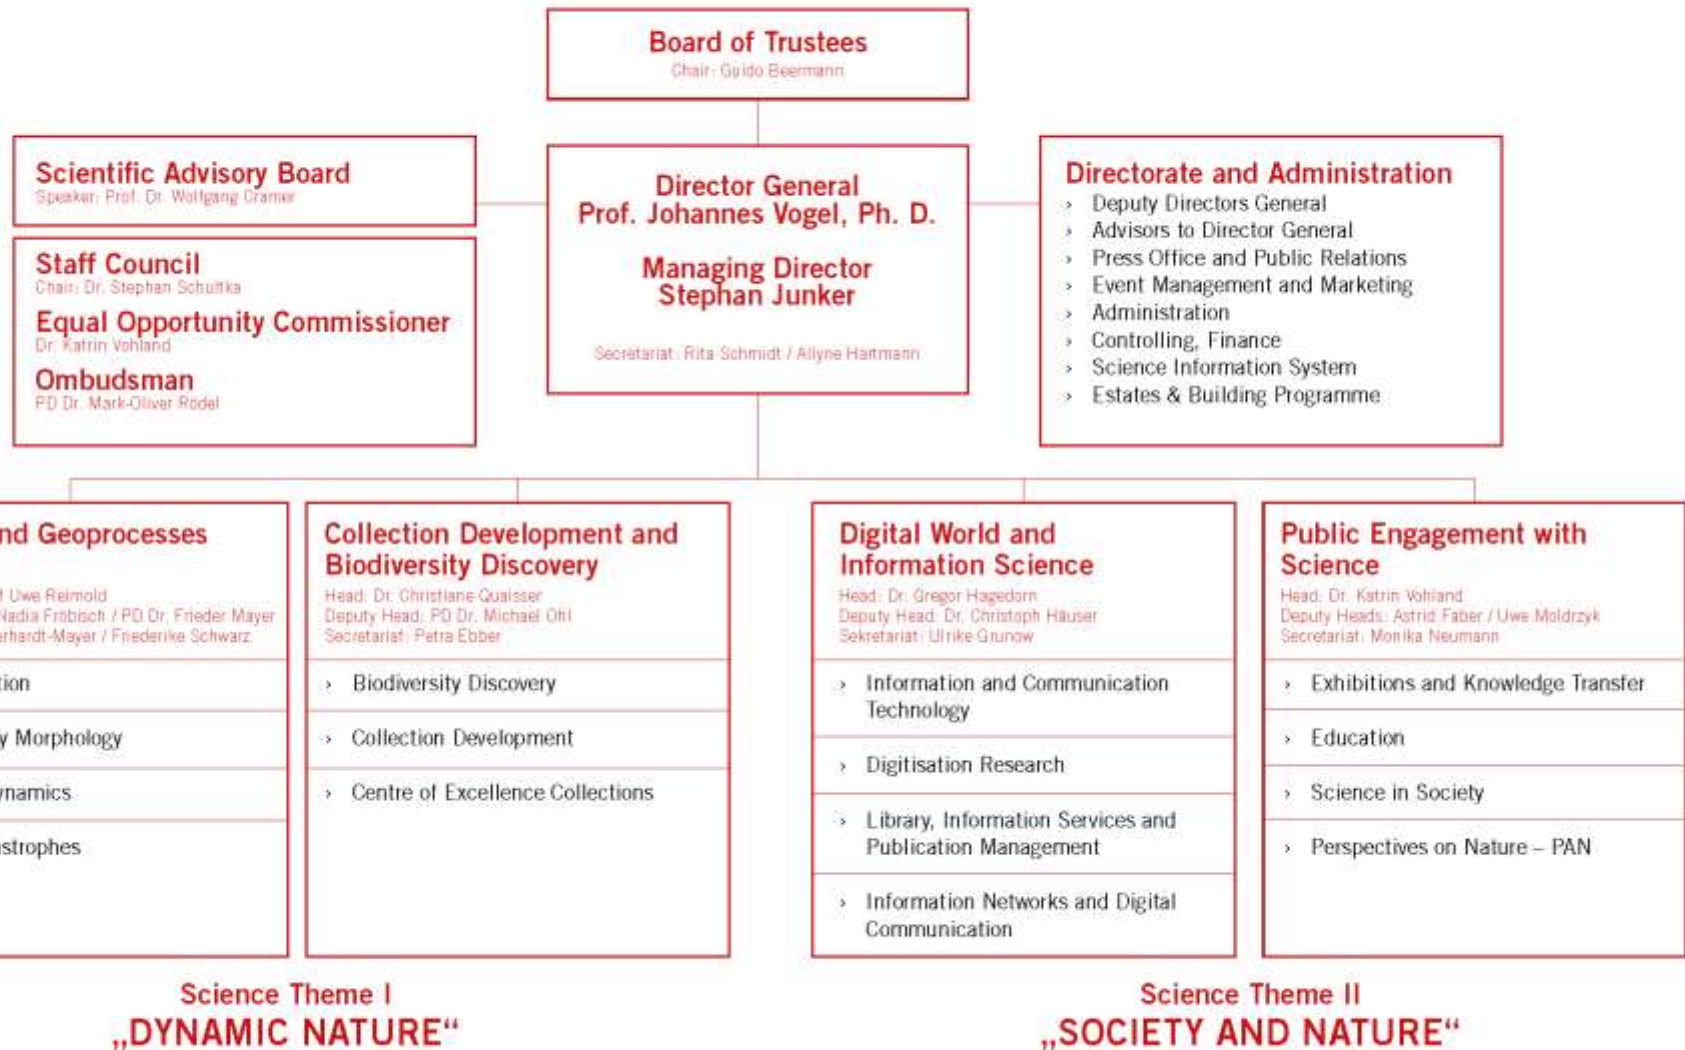

Museum für Naturkunde Berlin

Leibniz-Institute for Evolution-
and Biodiversity Science

- 1810 founded (with Humboldt Univ.)
- 1889 current building
- 2009 Member of Leibniz Society
- ca. 30 million Objects in the collection
- Among „top 10“ Berlin museums!
- 290 staff, 95 scientists

ORGANIGRAM

THE_Novel?

Singular artifact or work?

A close-up photograph of a person's hand holding a white rectangular card. The hand is positioned with the thumb at the bottom and four fingers at the top, gripping the card. The card is centered in the frame and contains three lines of bold, black, sans-serif text. The background is a plain, light color.

**Text was
digital \approx 2500
years ago**

A close-up photograph of a person's hand holding a small, white, rectangular card. The hand is positioned with the thumb at the bottom and four fingers at the top, gripping the card. The card is held against a plain white background. The text on the card is written in a bold, black, sans-serif font and is centered. The text consists of two lines: 'More types' on the top line and 'now.' on the bottom line.

**More types
now.**

No big deal

Big deal for:

- Preservation
- Participation
- Education

But:

- Physical objects
- Native digital objects
- Abstract objects

are all valuable and in scope.

But:

- Physical objects
- Native digital objects
- Abstract objects

are all valuable and in scope.

Stop acting defensive!

Digital Preservation

Current situation

@ Museum für Naturkunde

- 30 Mill. objects, > 100 separate collections
- **20 years object digitization in small projects:**
 - *Different databases, quality standards, information depth*
 - *Little coordination, little strategy possible*
- **Result: ca. 5 % metadata, ca. 1 % imaged**

→ **Plan for the next 400 years?**

Storage requirement @ MfN

- Audio (Animal Sound Archive): ca. **12 TB**
- 2D-Image repository ca. **8 TB**
- 3D-repository
 - current:
ca. **65 TB** aktiv + **30 TB** Rohdaten
archiviert
 - Future increment/year:
ca. **30 TB** aktiv + **20 TB** archiviert

Future

The Bouchout Declaration for Open Biodiversity Knowledge Management

The purpose of the Bouchout Declaration is to help make digital data about our biodiversity openly available. It offers members of the biodiversity community a way to demonstrate their commitment to open science.

Declaration

As signatories, we encourage an overarching approach to Open Biodiversity Knowledge Management which is based on the following fundamental principles: [...]
