Terms

- The database contains **items** (citizen science and crowdsourcing projects, community portals, services, software tools and frameworks, sources of information, standards)
- Each item has its **name** and a number of describing it **attributes**

<hr/>	
iNaturalist	
<hr/>	
Web	http://www.inaturalist.org
<hr/>	
Category	civic science project
<hr/>	
Field	natural sciences
<hr/>	
Description	iNaturalist is an online social network of people sharing biodiversity information to help each other learn about nature. It's also a crowdsourced species identification system and an organism occurrence recording tool. You can use it to record your own observations, get help with identifications, collaborate with other users, collect this kind of information for a common purpose, or access observational data collected by iNaturalist users.
<hr/>	

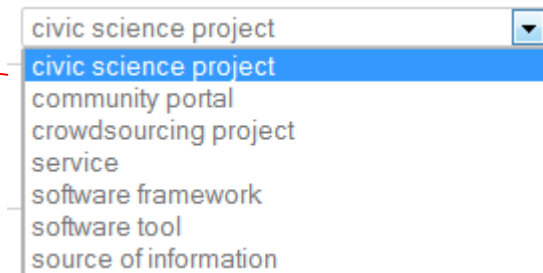

Attributes

- The number of attributes is variable
- Attributes have:
 - Single value (occur once) *e.g. description, status*
 - Multiple values (occur many times) *e.g. category, field*
- Attributes may be:
 - Mandatory *e.g. category, web*
 - Optional *e.g. status, technology*
- Attributes are of different types:
 - Enumerated (set of predefined values)
 - Text
 - Numbers
 - Date
- Set of attributes may be changed in future
- **The limitations aim at formally correct content!**

You may add (+)
or remove (-) them

You cannot add it more
than once

You cannot remove last
value of the mandatory attribute

Grant agreement n. 632694

Roles

- The editor
 - can add items
 - can modify „own” items
- The moderator
 - can add items
 - can edit all items
 - can delete items
